Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 – 4, drawn to a composition for enteric coating a natural product containing lectin comprising mannitol, Avicel® PH 101, calcium phosphate [sic] dibasic, hydroxypropylmethylcellulose, water, ethanol, Zein-DP and shellac.

Group II, claim(s) 5, drawn to a composition for enteric coating microcapsules containing lectin comprising, PLGA (polylactide-co-glycolide), methylene chloride, polyvinylalcohol, a surfactant, edible oil, sodium alginate and calcium chloride.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no general inventive concept shared by the two groups. In group I, any natural product containing

Art Unit: 1618

lectin can be coated with an enteric coating. In group II, lectin of any origin must be in the form of microcapsules and those microcapsules are then coated with an enteric coating. While both groups require an enteric coating, there is no overlap in the ingredients or solvents required for the enteric coating. The composition of group I requires ethanol, water, a sugar (mannitol), two types of cellulose (AVICEL® PH 101 and hydroxypropylmethylcellulose), zein (a protein) and shellac. The composition of group II requires a surfactant, an oil, calcium chloride, sodium alginate, polyvinyl alcohol and PLGA in methylene chloride, none of which are required in group I, and some of the ingredients are generally used in the preparation of microcapsules. Therefore, the two groups do not relate to the same general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Joint Inventorship

Art Unit: 1618

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
